Objective

As a software developer, my objective is to harness my programming skills to develop and enhance software solutions. I analyze user requirements, converting them into technical specifications and writing resilient code. Collaboration with diverse teams is crucial for innovation and optimization, ensuring scalability, security, and usability. I prioritize continuous learning to stay abreast of emerging technologies and industry standards while adhering to project timelines and quality benchmarks. Ultimately, my goal is to deliver high-quality software products that exceed client expectations and contribute to technological advancement.

Experience

- **Walter Sisulu University**   2022/05 - 2022/09
  Lab assistance
  In my role, I assist students with logging into institutional computers, monitor their activities, and provide support for administrative tasks. Additionally, I collaborate with the Head of Department (HOD) to manage paperwork and offer assistance to students with various applications. This encompasses a range of responsibilities aimed at ensuring smooth operation within the institution, facilitating student access to resources, and supporting administrative processes.

Education

- **Ad tshayingca S. S. S**   2018
  Matric
- **Walter Sisulu University**   2022
  ND : Information technology systems

Skills

- Microsoft 365 (Teams, SharePoint, word, excel ect.)
- Java, Javascript, Html5 and CSS3
- Problem solving
- OOD
- Html5, CSS and Javascript
- Mysql, postgreSQL
- Laravel, Django and visuall studio code
- SharePoint, Power Bi and power automate
